Audio Equalizer: You can adjust bass, treble and midrange on a + / – 6dB scale using commands like these (following the wake word):

Turn up the {bass / treble / midrange}.

Set {bass / treble / midrange} to {minus / plus} {number 1-6}.

I've found this voice command is finicky, and I often have to repeat it while speaking very clearly, loudly, and close to the device's microphones. When the command fails you'll get a response of, Hmm...I don't know that one.

Set the {bass / treble / midrange} to {maximum / minimum}.

Reset equalizer.

Sets all EQ scales back to zero.

Equalizer command examples:

Alexa, turn up the bass.

Alexa, set the treble to 3.

Alexa, reset the equalizer.

Playback controls:

Alexa, pause.

Alexa, resume.

Alexa, skip.

Alexa, next.

Alexa, stop.

Volume:

Alexa, volume up.

Alexa, volume 6.
